

ACCHS Course Syllabus

Course Title: Western Medical Sciences II

Course Number: WM223

Units/Hours: 3/45 Term Offered: VI

Instructor: Lisa Medel, D.C.

Course Objectives:

Students will compile the information they have learned thus far in Western medical anatomy, physiology, diagnosis, treatment and pharmacology into a cohesive format. Students will be familiarized with specific disciplines within Western medicine. Students will be confident in interacting with Western medical practitioners and will understand when to accept and send out patient referrals from/to the medical community. This course is a continuation of Western Medical Science I.

Teaching Methods:

Lecture, discussion, visual aids: charts, handouts, models, quizzes, midterm and final.

Grading Policy: 40% mid-term
45% final
15% quizzes and classroom participation

Prerequisites: Western Pathology, Western Diagnosis

Recommended Text: *Current Medical Diagnosis & Treatment*, 2006 ed, by Tierney et al

Reference Texts: *The Merck Manual*, 17th ed, by Beers and Berkow
